Together we are strong

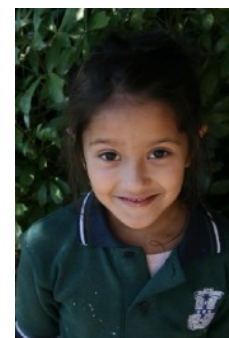

The Junior School Student Voice had a busy Term 2. We looked at different things that might improve our school environment. The first query we had was if there were enough water fountains around the school? We went around the school to see where the water fountains were. Although the fountains in the Junior School can get busy, we thought the Senior School may benefit from another drinking fountain. We asked some senior students who also had the same opinion. Perhaps this is something the school could consider in the future.

Meet Term 2's Student Voice Team

Another area of the school we looked at improving was the junior gazebo between the Year 1 and Year 2 classrooms. The children discussed what they would like and drew a plan of what it would look like. Some ideas included

- flower beds
- fixing the roof with coloured perspex
- outdoor cushions, bean bags
- a fish tank

This process of identifying a problem and finding a possible solution ties in with our next term's topic "I am an Innovator".

We wish the Term 3 Student Voice representatives all the best as they take the lead with this topic .

Staying safe at ENPS

We believe that it is important to stay safe in our junior playground. We looked at ways we can stop accidents on the platforms for the flying fox. We want students to only be on the wooden platform if they are about to use the flying fox. All other students that are waiting their turn, must wait off the wooden platform.

Ngā mihi,
Junior School Student
Voice Term Two
